ProCell Home Hair Care Serum for Men and Women

As we age, the growth (or “anagen”) phase of the hair cycle gets shorter and shorter, resulting in hair loss and thinning. Hair growth signal boosters will help turn these follicles back on to start growing again.

Scalp Nutrition

Our hair products contain **specific growth factors** that target the Wnt cell signaling pathway.

This line of cell communication is integral for hair follicle development and growth. When this pathway is activated, a regenerating effect can be seen as hair follicles grow larger in size and proliferation.

Without **Wnt signaling**, hair follicle genesis, function and phase transitioning is impossible.

Just because nature has slowed down doesn't mean you can't have a full head of hair. Take control and give your hair the boost it needs to get growing again.

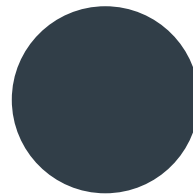

The Results

- Reduce the rate of hair loss and promote new growth
- Activate dormant stem cells within the hair follicle
- Increase fullness and density
- Improve overall hair texture

For best results, pair **home hair care serum** with professional **microchanneling hair** treatments from your provider.

Clinical Study Results After 12 Weeks

100%

Noticed new hair growth

92%

Saw dramatic improvements in hair quality & texture

Test study conducted by Dr. Bauman in 2019 using professional microchanneling procedures and the homecare in tandem.

FAQs

How soon can I use it after a professional hair treatment?

For your comfort, wait several days after a professional microchanneling hair treatment before using the home hair serum.

Are stem cells safe?

We harvest our growth factors from the stem cells of young, healthy, adult donors. These cells undergo rigorous screening before heading to our lab. From there, we remove the stem cells and pull out the powerful growth factors and cytokines to provide you with a superior product.

What if I skip a day?

No problem. This product works best with consistency so find a routine that works for you and make your own schedule.

Can I use with Minoxidil, Rogaine®, or other hair growth products?

We recommend only using onlyProCell Home Hair Serum for the duration of your home treatments.

Should I wash my hair after applying the Serum?

No. Let the growth factor product absorb fully into your scalp before shampooing. We recommend applying in the evening before bed, so that when you wake up in the morning, the hair serum has absorbed. Remember, you only need a few drops at a time. As much as possible apply the serum to the scalp, not the hair.
